The plan

Babel plan · Babel estimate

#	Language	Est. share	Qloo lift (range)	Cost (estimate)	Why
	Translate the game	**2 languages · $7,366**	Fits the budget and covers the most estimated demand.		
1	Russian	20.2%	● ×0.99 ×0.86–1.10	$3,508 game	Typical mix: 23.1% of non-English reviews, 1st (generic list: 5th). Qloo lift ×0.99 (about average); it stays 1st.
2	Spanish	13.4%	● ×1.16 ×0.94–1.31	$3,858 game	Typical mix: 13.2% of non-English reviews, 2nd (generic list: 6th). Qloo lift ×1.16: fans of the look-alikes are more over-represented there than fans of typical games; it stays 2nd.
	Store page only	**11 languages · $630**	The full game didn't fit; a translated store page tests the market with what is left.		
3	German	11.9%	● ×1.13 ×0.70–1.66	$60 page	The full game ($4,209) didn't fit; the store page tests this market.
4	Simplified Chinese	11.4%	● ×1.26 ×1.09–1.42	$60 page	The full game ($4,209) didn't fit; the store page tests this market.
5	Portuguese-BR	10.9%	● ×1.12 ×0.77–1.44	$50 page	The full game ($3,508) didn't fit; the store page tests this market.
6	French	9.4%	● ×1.16 ×0.87–1.50	$60 page	The full game ($4,209) didn't fit; the store page tests this market.
7	Korean	5.4%	● ×1.83 ×1.60–1.96	$65 page	The full game ($4,560) didn't fit; the store page tests this market.
8	Polish	4.8%	● ×0.91 ×0.59–1.24	$50 page	The full game ($3,508) didn't fit; the store page tests this market.
9	Japanese	4.7%	● ×1.95 ×1.34–2.39	$70 page	The full game ($4,911) didn't fit; the store page tests this market.
10	Italian	2.5%	● ×1.13 ×0.59–1.87	$55 page	The full game ($3,858) didn't fit; the store page tests this market.
11	Traditional Chinese	1.9%	● ×1.71 ×1.55–1.80	$60 page	The full game ($4,209) didn't fit; the store page tests this market.
12	Turkish	1.8%	● ×0.63 ×0.39–0.82	$50 page	The full game ($3,508) didn't fit; the store page tests this market.
13	Ukrainian	1.0%	● ×0.93 ×0.83–1.11	$50 page	The full game ($3,157) didn't fit; the store page tests this market.
	Skip for now	**1 language**	Over budget or under the demand threshold, for now.		
14	Thai	0.5%	● ×1.50 ×1.20–1.80	$3,858 game	Estimated demand (0.5%) is under the 1.0% threshold.

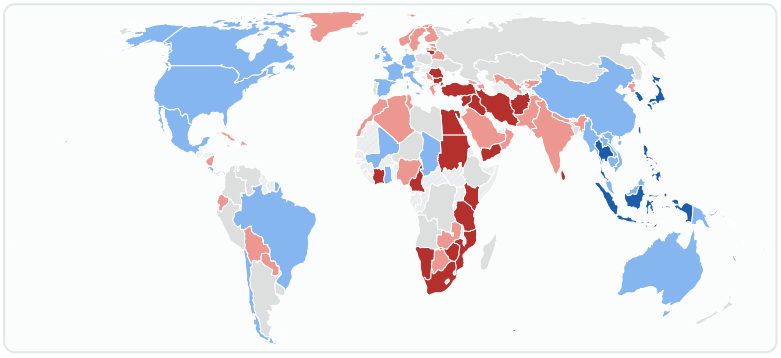

rank · Est. share of non-English demand (estimate, not sales) · Qloo lift vs typical games (Qloo data), range over single comparable games: ● agree ● disagree or partial ● no data

Usual advice: the generic tier list starts with Simplified Chinese, Japanese and Korean; for this game, Babel ranks Russian, Spanish and German first.

Explanation

Claude

For WEBFISHING (about 30,000 words, $10,000 budget), the plan fully translates the game into Russian and Spanish, adds translated store pages only for 11 other languages, and skips Thai for now, for an estimated $7,996 total with $2,004 unspent.

Written by Claude from the plan's evidence; code checked every number in it.

Limitations

Qloo measures aggregate cultural affinity, not individual preferences or guaranteed sales. Costs and shares are estimates, not quotes or sales. Babel does not predict revenue or ROI.

- Shares are estimates of where non-English demand is, not sales, wishlists or player counts.
- The baseline comes from Steam reviews of English-only games, which under-count players who need a translation (especially Chinese, Japanese and Korean).
- On small English-only indie games, Qloo's improvement over the baseline was small and not significant (backtest: +1.2 points of top-3 coverage, p = 0.50).
- Costs are estimates from editable per-word rates, not quotes.

Track record: on 186 notable games Qloo improved the top 3 ($p < 0.001$); on 71 small indies the gain was not significant.
